

Regarding the governor's push to renege on retirees' VSEA health plan as a way to "save money", I must plead with the legislature to deny his plans.

I worked hard for Vermont for many years with the promise of the secure medical plan the union agreed to. To privatize my care and threaten my Medicare is a horror I never anticipated. Please help us keep our present union negotiated plans, the same as current employees. I worry now Scott will take away my Medicare and put me into poverty after my years of service to Vermont. Republicans seem to only support themselves and their money grabbing supporters even here in Vermont.

Thank you for your service.
